Impact XP

- ✓ No mixing!
- ✓ No pouring!
- ✓ No mess!

Ready to use:

Impact XP is the most advanced, ready to use line marking paint available. It has been formulated using a high titanium content, for increased whiteness and durability. XP does not lose its characteristic brightness during wet conditions. It requires no mixing or pouring, but is applied direct from its container, without the addition of water.

Impact XP:

Impact XP is an environmentally friendly paint, formulated for use on grass sports and playing fields. The paint was developed with the iGO spray machine, to give consistent, bright white, and coloured markings. Dependent on the needs of the job, it can be applied using Impact cone or flat fan nozzles. Using cone nozzles allows you to over mark a standard soccer pitch **from** as little as 1.1ltrs of paint. With the appropriate nozzle, 1.5ltrs of paint will overmark, to a sports club standard.

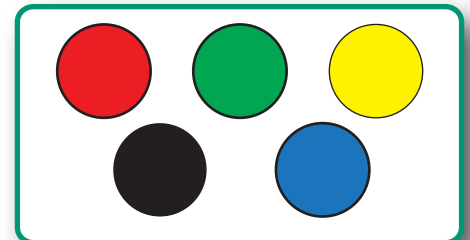

1 x 10ltr container
can over mark
6 pitches

Impact XP is supplied in white, HDPE grade, stackable, UN containers. Caps are colour coded to reflect the paint colour.

Impact XP gives superior leaf coverage ensuring a clean, crisp, white line, time after time.

Impact XP is also available in the colours shown above
